

LEDPro Overview Chart

The chart below illustrates the steps to navigate throughout the LEDPro System.

Register

Register for a new account with LEDPro.

- You will receive an e-mail message confirming you have successfully registered with the LEDPro web site.
- You will be automatically logged into LEDPro.

Login

Login to the LEDPro System.

- You will receive a message stating you have successfully logged in and to follow the remaining steps.

Create a New Advance

Create a new advance notice.

- Once the radio button has been selected, a pop-up box will prompt you to select the program(s) for the advance notice.

Make Payment

Pay on an existing advance notice or application.

- After entering the required information, you can make a payment on a newly created or existing advance notice or application.
- You will receive an e-mail message confirming you have successfully made a payment.
- Upon successful payment, a unique reference number is assigned.

View an Advance/Application

View an existing advance notice or application.

- You will be able to search for a completed advance notice or application.

Save

Save your work.

- The first time you save an advance notice or application, you are assigned a unique reference number.
- You can save an existing advance notice or application and resume editing at any time.

Resume Edit

Edit an already saved advance notice or application.

- You will be able to edit an existing advance notice or application.

Get Advance Number

Search for the assigned advance notice number.

- Use the search page to lookup the advance notices created using your profile.
- Find the advance notice number you will use to create a new application.

Create a New Application

Create a new application from an existing advance number.

- Once the radio button has been selected, a pop-up box will prompt you to select the program(s) for the application.

Get Application Number

An application number is assigned.

- Use the search page to lookup the applications created using your profile.
